

**APPENDIX A**  
**"CLEAN" VERSION OF EACH PARAGRAPH/SECTION/CLAIM**  
**37 C.F.R. § 1.121(b)(ii) AND (c)(i)**

**SPECIFICATION:**

Please replace the original specification with the clean copy of the substitute specification attached hereto.

**CLAIMS:**

---

A1 7. (Amended) A portable information radio terminal device as set forth in claim 1, wherein said device body is divided in the longitudinal direction into first and second halves, and said elastic member is provided only on one of said first and second halves where a center of gravity of said portable information radio terminal device is located. C

8. (Amended) A portable information radio terminal device as set forth in claim 2, wherein a plurality of elastic members are provided per side of said printed board.

Sub B1 9. (Amended) A method of manufacturing a portable information radio terminal device for assembling a first casing and a second casing, and housing a printed board between said first and second casings, comprising:

a step of arranging said printed board on one of said first and second casings with an elastic member positioned between said printed board and said one of said first and second casings to support said printed board; and

a step of assembling the other of said first and second casings to said one of said first and second casings while interpositioning said elastic member between said other of said first and second casings and said printed board.

<sup>3</sup>10. (Amended) A method of manufacturing a portable information radio terminal device as set forth in claim <sup>2</sup>9, wherein said elastic member is pressurized upon assembling said first and second casings.
